Jinxin Yang

Chengdu, China | el23jy2@leeds.ac.uk | +86 191 5886 7927

Education

SWJTU–Leeds Joint School, Southwest Jiaotong University Sep. 2023–Present
BEng in Electronic & Electrical Engineering | *GPA: 3.91/4.00* *Chengdu, China*

Research Interests

Wireless Communications | Graph Neural Networks (GNNs) | Computer Networks | Networked Systems | Machine Learning

Research Experience

University of California, Irvine Jun. 2026–Present
Research Intern | *University of California, Irvine* *Irvine, CA, USA*
Supervisor: Prof. Yanning Shen

Semantic Wireless Communications: Real-Time Remote Tracking Jun. 2025–Jun. 2026
Research Intern | *University of California, Santa Cruz* *Santa Cruz, CA, USA*
Supervisors: Prof. Hamid Sadjadpour and Dr. Mohammad Moltafet

- Develop stochastic models of sampler–sink status-update systems with random two-way delay and finite buffer size, extending them to multi-packet regimes for AoI analysis.
- Formulate long-run AoI minimization as an average-cost Markov decision process and analyze weak-accessibility conditions and structural properties of stationary optimal sampling policies.
- Implement reinforcement-learning algorithms in Python to compute near-optimal policies and quantify AoI performance under varying system parameters.

Multi-Access Edge Computing and Deep Reinforcement Learning Oct. 2024–Mar. 2025
Research Assistant | *Southwest Jiaotong University* *Chengdu, China*
Supervisor: Prof. Xiangyi Chen

- Reviewed literature on multi-access edge computing, deep reinforcement learning, Markov decision processes, and Lyapunov optimization, focusing on AoI-aware scheduling and offloading policies.
- Built MATLAB simulation frameworks for task offloading and resource allocation in edge-assisted networks and reproduced key baselines from recent work.

Wireless Data Acquisition for Permanent-Magnet Synchronous Linear Motors May 2024–Apr. 2025
Undergraduate Researcher | *Southwest Jiaotong University* *Chengdu, China*
Supervisor: Prof. Jiling Guo

- Co-designed sensor and interface circuits and analyzed motor force characteristics under different operating conditions.
- Developed embedded C firmware on STM32 to acquire multi-channel sensor data via on-chip ADCs and transmit measurements over Bluetooth.
- Contributed to reports and presentations that led to recognition as a university-level "Excellent Student Research Training Program."

Publications & Patents

Publication

J. Yang, M. Moltafet, and H. R. Sadjadpour, "Status Updating in Two-Way Delay Systems with Preemption," *IEEE Communications Letters*, 2026.

Patent

X. Chen, H. Liu, C. Cheng, Z. Meng, **J. Yang**, Y. Fan, H. Xing, and L. Feng, "Energy-Efficient Service Deployment and Delivery Method and System for Edge Computing Networks," Chinese Invention Patent Application No. CN 202510971145.4, Notice of Allowance issued May 2026.

Honors & Awards

First-Class Scholarship (Top 1%), SWJTU–Leeds Joint School Nov. 2024
Merit Student (Top 3%), Academic Year 2023–2024 Nov. 2024
Provincial Third Prize, Lanqiao Cup Microcontroller Design Competition Apr. 2024

Technical Skills & Languages

Programming: C, Python, MATLAB, HDL, LaTeX
Languages: Mandarin (Native); English (TOEFL iBT 96, CET-6 593)
